Challenges in a world in transition- M2

Prof. Vera Lomazzi

Assignment

Assignment

- Goal: unveil social sustainability issues of environmental conflicts
- Reference: work done for the first assignment
- Analyze the issues from a different perspective
- Use the sociological knowledge regarding inequalities, SDGs, etc., to discuss challenges and opportunities (NO COMMON SENSE!)

Activity to carry out

- Discuss in group
- Use concepts discussed in the course to analyze social sustanaibility issues related to the environmental conflicts
- Try to answer the questions
- Prepare a integrated (mod1+2) presentation (about 20 min in total MAX)
- Give the presentation on **15 December**
- (send the presentation by 14.12 at the latest!)

Aspects to be addressed

- What are the issues concerning social sustainability?
- What are the social challenges for sustainable development? *(ref to SDGs)*
- Do you see elements of (potential) global inequalities? *(Provide arguments and examples, also reflect about the intersectionality of inequalities)*
- From your analysis: is there any paradox that emerges?
- What about the future? How do you think this issue will evolve and impact on global social inequalities? *(different scenarios might be possible)*
